MEMORANDUM FOR: Chief, Signal Analysis Division
Ground Systems Group/OSO

FROM:

25X1

Special Assistant for Technology
Engineering Support Group/FBIS

SUBJECT:

Request For Analysis of Jamming on
Korean Radio Station Broadcasts

25X1

1. As I explained in our previous telephone conversation, FBIS is interested in collecting broadcasts from the clandestine North Korean radio station called: "The Voice of National Salvation." However, the South Koreans are jamming all of the daily broadcast except for the half-hour segment in English.

25X1

2. As you advised, I have since discussed this problem with of SAD and, based on her technical suggestions, I have obtained tape recordings of this station from the FBIS Seoul and Okinawa Field Bureaus. I am sending these tapes over to SAD, attention

25X1

3. I appreciate the support of SAD in looking into this problem. We realize that it may be impossible to remove any or all of the jamming, but we are interested in understanding, at least, what kind of jamming it is. I intend to work with on this problem and I will be the FBIS point-of-contact for SAD. Thank you.
